

REMARKS/ARGUMENTS

I. Introduction

A restriction requirement was issued in the parent patent application. In response to the restriction requirement, claims 44-71 were canceled in the parent application. **Claims 1-43 have been canceled in the present application leaving claims 44-71 which were withdrawn from consideration in the parent application.** Accordingly, claims 44-71 are now pending.

The amendments to the figures, abstract and specification are the same as those which were reviewed and approved by the Examiner in the parent application.

In the Office Action which issued in the parent application the Examiner objected to figures for failing to show every element of the claims and also objected to the abstract because of the abstracts wording. The figures and abstract have been amended herewith to address the objections raised by the Examiner in the parent application and to avoid the objections being repeated in the present application.

New Figure 11 comprises the combination of Figures 11A, 11B and 11C. **These figures are supported by the original claims** and other text of the specification and therefore do not constitute new matter and were approved by the Examiner in the parent application.

Entry of this preliminary amendment and allowance of the claims is respectfully requested.

Respectfully submitted,

December 29, 2003
